RI-Opac: Literature Database for the Middle Ages – Listing **over 2.3 million titles**

The RI-Opac is a freely accessible database, covering all disciplines of medieval sciences for the European language sphere.

Within the context of the project Regesta Imperii Online, the RI-Opac is both an online bibliography of the literature quoted in RI publications and a freely accessible, comprehensive database for historical research. One of the system's main goals is the in-depth recording of non-independently published literature, such as essays and proceedings; brought together from myriad collected editions and magazines even of the most remote origin.

The RI-Opac database is maintained by the RI-staff and numerous colleagues of the online editorial department of Regesta Imperii.
